

ICU Eve Mini™

SMART CHARGING WITH A SOLID CHARGING
STATION IN A MODERN, COMPACT HOUSING

The Eve Mini is the latest addition to the complete line of ICU EV charge points. The Eve Mini has a single socket or tethered cable and is suited for any electric car thanks to its wide range of charging capacities. Smart technology enables the charging station to support the settlement of charging costs whilst ensuring your car is charged at optimal speed. The housing of the Eve Mini is extremely robust, compact and has a modern design. This makes the Eve Mini perfectly suited for both home and the workplace.

ICU Eve Mini

The charging station

The highest quality charger for the most competitive price

The Eve Mini is highly robust and offers smart functionalities which support payment settlement and load balancing. And all that at a competitive price.

SIM unlocked, free choice of service provider

All charging stations of ICU are SIM unlocked. This means that you are free to choose the charging services and payment system that best suits your needs.

Always charge at maximum power

The Eve Mini can be connected to a smart meter and thus takes the power consumptions of other appliances into account. This means that the Eve Mini always uses the maximum power.
